

Section 1: Product and Company Identification

Product Name: Magnum Products Dry Powder Joint Compounds

Product Identifiers:

Mud in a Bag Light Weight and Standard Weight

Other means of identification: Dry Joint Compound, Dry bag, Mud

Recommended Use: For finishing and repairing interior gypsum board

Restrictions on Use: Use in well ventilated area avoid breathing dust during use, while opening and closing bags, and during mixing and sanding. Use personal protective equipment, avoid skin contact.

Manufacturer/Supplier Details

Section 2: Hazards Identification

United States (US)

According to OSHA 29CFR 1910.1200 (HCS)

GHS Classification of the substance or mixture

Carcinogenicity - Category 1A - (H-350)

Specific target organ toxicity, repeated exposure – Category 1 (H-372)

Acute toxicity, inhalation - Category 4 (H-332)

Skin corrosion/irritation Category 2 (H315)

GHS Label Elements

Pictogram

Danger

Signal Word

Hazard Statements

H-350 May cause cancer.

H-332 H-372 Dust harmful if inhaled. May cause damage to organs (lungs, liver, thyroid gland) through prolonged or repeated exposure. (oral)

H-315 Causes skin irritation

Section 2: Hazards Identification (Continued)

Precautionary Statements

Prevention

Obtain special instructions before use.
 Do not handle until all safety precautions have been read and understood.
 Do not breathe dust.
 Use personal protective equipment as required. (See Section 8)
 Use engineering controls and wet sanding/sponging methods to minimize dust.

Response

If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing.
 If on skin, wash with plenty of soap and water.
 If in eyes, rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
 Get medical attention if exposed or concerned.

Storage

Store Locked up. Keep material in a cool, dry, ventilated area, away from water and moisture.

Disposal

Dispose of material in accordance with International, federal, state, and local regulations

Section 3: Composition/Information on Ingredients

Chemical Name	Common name Synonym	Identifiers CAS #	% (weight)	Impurities
Calcium Carbonate	Limestone	1317-65-3	<50	Crystalline silica CAS# 14808-60-7
And may contain one or more of the following:				
Mixture silicates	Mica	12001-26-2	<10	Crystalline silica CAS# 14808-60-7
And aluminates				
Mixture various metal oxides	Perlite	93763-70-3	<10	Crystalline silica CAS# 14808-60-7
Magnesium aluminum phyllosilicate	Attapulgite Clay	12174-11-7	<5	Crystalline silica CAS# 14808-60-7
Starch		9005-25-8	<5	
Ethylene vinyl acetate	Latex	24937-78-8	<5	

Section 4: First-Aid Measures

Inhalation Remove exposed individual to fresh air immediately. If breathing difficulty persists, seek medical attention.

Eye contact Do not rub or scratch eyes. Immediately flush eyes with water for 15 minutes.

Remove contact lenses (if applicable). Seek medical attention if irritation persists.

Skin contact Flush and wash skin with soap and water. Utilize lotions to alleviate dryness if present. Seek medical attention if irritation persists.

Ingestion This product is not expected to be hazardous and no harmful effects are expected upon ingestion of small amounts. Larger amounts may cause abdominal discomfort or possible obstruction of the digestive tract.

Seek medical attention if problems persist.

Medical Conditions aggravated by exposure

Pre-existing upper respiratory and lung diseases such as, but not limited to, bronchitis, emphysema and asthma. Pre-existing skin diseases such as, but not limited to, rashes and dermatitis.

Section 5: Fire-Fighting Measures**Extinguishing Media**

Dry chemical, foam, water, or extinguishing media appropriate for surrounding fire.

Unusual Fire and Explosion Hazards

Mixture poses no fire-related hazard.

Special hazards arising from the mixture

None known

Special Protective Equipment and Precautions for Firefighters

A SCBA and full protective clothing is recommended to limit exposures to combustion products when fighting any fire.

Section 6: Accidental Release Measures**Personal precautions, protective equipment and emergency procedures**

No special precautions required.

General recommendations:

Wear appropriate Personal Protective Equipment. (See Section 8)

Maintain proper ventilation.

Environmental precautions

This product does not present an ecological hazard to the environment, however this does not exclude the possibility that large and frequent spills may be harmful to the environment. Do not discharge to sewers, drains and water systems. Dispose of in accordance with applicable International, federal, state, and local regulations.

Methods and materials for containment and cleaning up

Shovel or scoop spilled material back into container for use, if possible, or disposal. Clean surface to remove residual contamination.

Maintain proper ventilation to minimize dust.

Avoid washing material down drains, sewers, and water systems. This material can cause clogs.

Section 7: Handling and Storage**Precautions for safe handling**

Avoid breathing dust. Avoid contact with eyes and skin.

Minimize generation of dust during use, while mixing and sanding, and when opening and closing bags.

Provide appropriate exhaust ventilation at places where dust is formed.

Wear recommended personal protective equipment when handling. (See Section 8)

Conditions for safe storage, including any incompatibilities

Store locked up. Keep material in a cool, dry, ventilated area.

Maintain temperature between 50-100 degrees Fahrenheit.

Keep containers closed when not in use.

Stack material flat on floor, maximum one pallet high.

Avoid contact with strong acids.

Section 8: Exposure Controls/Personal Protection**Control Parameters**

Component	Exposure Limits	
	OSHA PEL (mg/m3)	ACGIH TLV (mg/m3)
Calcium Carbonate (limestone)	15 (T) 5 (R)	10 (T)

Section 8: Exposure Controls/Personal Protection (Continued)

Control Parameters

Component	Exposure Limits	
	OSHA PEL (mg/m ³)	ACGIH TLV (mg/m ³)
Mica	20 mppcf	3
Perlite	15(T) 5(R)	10 (T)
Attapulgite Clay	15(T) 5(R)	10 (T)
Crystalline Silica 1	[(10)/(%SiO ₂ +2)] (R) [(30)/(%SiO ₂ +2)] (T)	.025 (R)
Starch	15(T) 5 (R)	10(T) 5(R)
Ethylene Vinyl Acetate Latex	NE	NE

1-Present as an impurity in raw materials NE-None Established (T)-Total Dust (R)-Respirable Dust
 Mppcf-Million particles per cubic foot

Exposure Controls

Appropriate Engineering Controls

Work/Hygiene Practices: Utilize ventilation methods to minimize dust production. Use sanders equipped with vacuum capabilities whenever possible. Utilize a light water spray when feasible, wet sand or sponge this product.

Ventilation: Provide local and general exhaust ventilation sufficient to maintain a dust level below the PEL/TLV.

Personal Protective Equipment

Respiratory Protection

A NIOSH/MSHA approved particulate respirator must be worn at all times if the PEL/TLV is exceeded. OSHA's 29 CFR 1910.134 (Respiratory Protection Standard) must be followed whenever work conditions require respirator use.

Eye Protection

Safety glasses or goggles.

Skin

Gloves, long sleeve shirts/long pants and/or barrier creams may be utilized if conditions warrant.

Section 9: Physical and Chemical Properties

- (a) **Appearance:** A semi white powder
- (b) **Odor:** Mild latex, Low to none
- (c) **Odor threshold:** Not applicable
- (d) **pH :** 7-9
- (e) **Melting point/freezing point:** Not applicable
- (f) **Initial boiling point and boiling range:** Not applicable
- (g) **Flash point:** Not applicable
- (h) **Evaporation rate:** Not applicable
- (i) **Flammability (solid, gas):** Not flammable
- (j) **Upper/lower flammability or explosive limits:** Not applicable
- (k) **Vapor pressure:** Not applicable
- (l) **Vapor density:** Not applicable
- (m) **Relative density:** ~1.0-1.8
- (n) **Solubility(ies):** slightly soluble in water
- (o) **Partition coefficient: n-octanol/water:** Not applicable

Section 9: Physical and Chemical Properties (Continued)

- (p) **Auto-ignition temperature:** Not applicable
(q) **Decomposition temperature:** 825°C
(r) **Viscosity:** Not applicable
(s) **Volatile organic compound (VOC) content:** none detected

Section 10: Stability and Reactivity

- (a) **Reactivity:** This product is stable and non-reactive under normal conditions of use, storage and transport.
(b) **Chemical stability:** Stable in dry environments
(c) **Possibility of hazardous reactions:** None known
(d) **Conditions to avoid (e.g., static discharge, shock, or vibration):** None known
(e) **Incompatible materials:** Strong acids
(f) **Hazardous decomposition products:** None known. Above 825° C limestone (CaCO₃) decomposes to calcium oxide (CaO) and carbon dioxide.(CO₂)

Section 11: Toxicological Information**Information on Toxicological effects****Information on likely routes of exposure**

Ingestion Possible abdominal obstruction.

Inhalation Dust may irritate respiratory system. Chronic exposure may result in lung disease. (See below)

Skin contact May cause irritation, rash, itching, or dermatitis.

Eye contact Dust may cause mechanical irritation.

Symptoms related to the physical, chemical and toxicological characteristics

Acute exposure to airborne dust concentrations in excess of the PEL/TLV may result in coughing, dyspnea, wheezing, and a burning irritation of the nose, throat, and upper respiratory tract, along with possible impaired pulmonary function. Chronic exposures may result in lung disease. (Silicosis and/or lung cancer)

Toxicological data

No toxicological data is available for this product. Toxicological information for components of this product listed below.

Acute toxicity: Not expected to be a hazard under normal conditions of intended use

Skin corrosion/irritation: Prolonged skin contact may cause irritation or rash.

Serious eye damage/eye irritation Not available

Skin sensitization: This product not expected to cause skin sensitization

Respiratory sensitization Not a respiratory sensitizer

Mutagenicity Not available

Carcinogenicity

This product contains small amounts of naturally occurring crystalline silica (quartz) an impurity in some of the raw materials. The International Agency for Research on Cancer (IARC) classifies crystalline silica inhaled in the form of quartz or cristobalite from occupational sources as carcinogenic to humans, Group 1. The National Toxicology Program (NTP) classifies respirable crystalline silica as a substance which may be reasonably anticipated to be a carcinogen. OSHA does not regulate crystalline silica as a human carcinogen. Some products may contain attapulgite clay. IARC classifies attapulgite (long fiber) carcinogenic to humans, Group 2B. Attapulgite is not classified as a carcinogen by NTP or OSHA. Exposures to respirable crystalline silica are not expected during the recommended use of this product. However, actual levels must be determined by workplace Industrial Hygiene testing.

Reproductive effects: Not expected to be a reproductive hazard

Specific target organ toxicity single exposure: Not available

Aspiration toxicity: Not an aspiration hazard

Section 12: Ecological Information

(a) Ecotoxicity (aquatic and terrestrial, where available): This product does not present an ecological hazard to the environment. However large and frequent spills may damage environment.

(b) Persistence and degradability: Unknown

(c) Bioaccumulative potential: Limestone is a naturally occurring mineral. Biodegradation and/or bioaccumulation potential is not applicable.

(d) Mobility in soil: Unknown

(e) Other adverse effects (such as hazardous to the ozone layer): None known

Section 13: Disposal Considerations

This material is not considered a hazardous waste. Dispose of according to Local, State, Federal, and International Environmental Regulations.

Section 14: Transport Information

This product is not a DOT hazardous material

Shipping Name: Same as product name

ICAO/IATA/IMO: Not applicable

Section 15: Regulatory Information

All ingredients are included on the TSCA inventory.

Federal Regulations

SARA Title III: Not listed under Sections 302, 304, and 313

CERCLA: Not listed

RCRA: Not listed

OSHA: Dust and potential respirable crystalline silica generated during product use may be hazardous.

State Regulations

California Prop 65: Respirable crystalline silica is known to the state of California to cause cancer.

Canada WHMIS

All components of this product are included in the Canadian Domestic Substances List (DSL).

Crystalline silica: WHMIS Classification D2A

Section 16: Other Information

SDS Prepared by: Magnum Products
15740 W. 108th Street
Lenexa, KS 66219

Phone Number: (913) 888-0882

Prepared: May 30, 2015

Issued Date: June 1, 2015

Replaces: March 14, 2011

Section 16: Other Information (Continued)**Further information**

Crystalline silica: Raw materials in this product may contain respirable crystalline silica. Exposures to respirable crystalline silica are not expected during the normal use of this product. However, actual levels must be determined by workplace hygiene testing. Prolonged and repeated exposure to airborne free respirable crystalline silica can result in lung disease (i.e., silicosis) and/or lung cancer.

Attapulgit: Carcinogenic to experimental animals via a route of exposure not relevant to human exposure.

NFPA health hazard: 1 - Exposure could cause irritation but only minor residual injury even if no treatment is given.

NFPA fire hazard : 0 - Materials that will not burn.

NFPA reactivity : 0 - Normally stable, even under fire exposure conditions, and are not reactive with water.
