TO OUR CUSTOMERS

MAGNUM joint treatment products will meet or exceed ASTM C-475-89. **MAGNUM PRODUCTS** are manufactured exclusively for the professional Drywall Applicator and are known within the industry as a premium quality material.

MAGNUM joint treatment products will meet or exceed all other manufactures product lines for these performance characteristics; Workability, Open time, Consistent Quality, Viscosity Control, Shrinkage, Adhesion, Sandability, Air Entrainment and Cracking. We stand behind our products 100% for these factors. If you have any questions concerning any of these factors **MAGNUM PRODUCTS** will do their best to have a product specialist on your job site within 24 hours or less, to help answer your questions or help solve your problem.

MAGNUM PRODUCTS are compatible with all gypsum wallboards that are made to ASTM specifications. When finishing Gypsum Wallboard strict adherence to the 5 levels of finish must be followed as prescribed by The Painting and Decorating Contractors of America, The Gypsum Association, The Association of Walls and Ceiling Contractors International, and the Ceilings and Interior Systems Construction Association. These Specifications are available on request, from any of the above organizations or from **MAGNUM**.

Thank you,
