

Interior Drywall Primer/Surfacer

Description:

Magnum Level Coat is a professional grade, paint underlayment/ primer/surfacer. This vinyl-based product is designed to equalize the porosity or suction differences between the wallboard surface and the drywall joint compound. This allows the paint to dry at a uniform rate, minimizing flashing, banding, and photographing under critical lighting conditions with flat or gloss paints.

Advantages:

- Replaces standard priming & skim coating for a level 5 finish
- Allows paint to dry uniformly
- Paint or decorate in one hour
- Water clean up
- Gives better paint coverage

Coverage:

15 mil/wet
One gallon covers approximately 130 square feet.

Available in:

- 5 gallon pails/18.9 liter--ready mix
- 25 lb bags--dry

Site Requirements and Storage:

- Maintain 50° F building temperature
- Provide adequate mechanical ventilation
- Protect from freezing, extreme heat, direct sunlight
- Rotate stock every 90 days

Preparation

Surfaces must be clean, free of oil, wax, nicotine, and dust. Peeling paint must be removed by sanding, washing, or scraping. Then clean with 1 part household bleach to 3 parts water. Level Coat is not to be used as a sealer.

Application:

Apply by spray application to interior drywall surfaces only.

Application Caution:

Due to the low shrinkage nature of the product, backrolling will leave a "stippled" finish. Extra attention will be necessary to insure the absence of roller marks. Do not over thin. Do not apply when temperature is below 50° F. Wipe up drips or splatter before drying. Caution contact Magnum before applying over concrete.

Standards:

Refer to Gypsum Association Publication GA-214, Titled; "Recommended Levels of Gypsum Board Finish" or ASTM C-840. A minimum level 4 drywall finish is recommended before application of Level Coat.

Precautions:

When sanding, use a dust collector, eye protection and a NIOSH approved respirator. Must not be taken internally. If swallowed contact physician. Keep Out Of Reach Of Children.
